

## **Press Release Wöhr Combilift 553 / 554**

New and - live on the Wöhr exhibition booth: The intelligent spacesaver Combilift 553 with only 2 empty spaces within the system for independent parking on 3 levels without pit.

The parking places on entrance level are shifted laterally, the places on middle level shift laterally and vertically, the upper level places shift only vertically. The 2 empty spaces are always one on middle and one on entrance level.

A compact solution for high buildings as well as for outdoor structures with roof : For offices, apartments and hotels or for commercial use with valet parking or attendant for new buildings as well as for buildings into the structure.

Standard moduls are for 2 or 3grids, which can be combined differently. A 10grid version for 28 cars is the maximum arrangement with one central operating device. It can be installed as 5 x 2grids or 2 x 2grids and 2 x 3grids depending on the building structure.

The Combilift 554 offers independent parking on 4 levels without pit with 3 empty spaces (on the 2 middle levels and on entrance level).

Comfortable platform widths and platform distances are available to park all car classes.
